

OptiBond™ Universal 360

Single Component Universal Adhesive

The One for All.

Meet OptiBond Universal 360, the revolutionary new bonding agent that offers the best outcome to every clinician, regardless of what materials they use or which techniques they follow. No matter what your goals are, OptiBond Universal 360 can help your dental practice meet them with ease.

Universal, Multi-Purpose Solution

Powered by Kerr's patented GPDM technology, now enriched with MDP, OptiBond Universal 360 is a truly universal system offering reliable bond strength to all surfaces and substrates, with any resin cement, even in the absence of light. This one-bottle solution offers the flexibility to be used with any etching technique in both direct and indirect restorations.

Exceptional Bond Strength

OptiBond Universal 360 offers equal or superior bond strength results in combination with Kerr and leading competitor cements, even in total dark cure mode, without auxiliary products.

Improved Bottle Delivery

Thanks to the all new ergonomic bottle design, you'll only need one hand for opening, dispensing, and closing. Plus, you can use the dropper to deliver a precise drop size at every application, without worrying about leakage before and after. This leads to less waste and more efficiency.

Revolutionize Your Practice with One Bottle

98%

of dentists agree that their patients did not have any post-operative sensitivity

Simple Application

It couldn't be easier or more convenient to apply OptiBond Universal 360. This advanced formula combines etching, priming, and bonding in just one bottle. It's effective with as little as one coat, without auxiliary products, even in total dark cure mode. You can count on it to save you time and money on inventory.

Esthetic Restorations

OptiBond Universal 360 uses a less yellow formulation than leading competitive bonding agents, offering more esthetic results.

Three Solvents in One

Kerr's patented Ternary Solvent System technology and optimal hydrophobicity and hydrophilicity balance allow OptiBond Universal 360 to deliver excellent penetration into dentinal tubules, giving you extraordinary bond strength and protection against microleakage and post-op sensitivity.

Minimal Post-Op Sensitivity

OptiBond Universal 360 ensures optimal tooth penetration to help you reduce post-op sensitivity risk and increase patient satisfaction.

Ordering Information

Part #	Item Description
36885	OptiBond Universal 360 - Bottle Kit
36886	OptiBond Universal 360 - Unidose Kit
36887	OptiBond Universal 360 - Bottle Refill
